#### \*IMPORTANT\*

- AEG ovens are supplied with a 5' long electrical cable and must be hard wired to the electrical supply.
- AEG ovens use the following wires:
  - RED & BLACK: Live Wires
  - GREEN: Ground
  - The Neutral (WHITE) wire is not required for the electrical installation.

#### VOID CUT-OUT

- If the oven is mounted in a tall or semi-tall cabinet, there must be a minimum gap of 119/16" (4cm) cut out of the shelf and behind the upper cabinet to allow air to flow freely
- A void must be cut-out in the shelf of the cabinet. Leave 4" of shelf material around the void.
- Additional support must be added to the shelf with the void. The support must be able to withstand the oven weight. If sufficient air flow is not provided, the life of the appliance will be shortened.
- Cut-out in the toe kick is required for adequate air flow.
- Bottom vent grill (7427640) available.
