## Compact System, Clearly Good Sound

Thanks to its internal amplifier and a pair of separate speakers, the compact PM270 is big on performance. The speakers feature 10cm full-range drivers with bass reflex ports to comfortably deliver 20 watts of stereo sound.

## The Small System that's Big on Choice

Love the simplicity of radio and CD? Then choose PM270 with stereo FM tuner and CD player built-in. You can connect wirelessly to your mobile, with Bluetooth® for podcasts or playlists. Plus, USB connection adds listening choice.

## Stream Playlists and Podcasts Wirelessly with Bluetooth®

Using built-in Bluetooth, PM270 can play audio wirelessly from your smartphone or tablet. Bluetooth Remaster helps compensate for audio frequencies lost by the convenience of wireless transmission, to achieve higher-quality sound. Listening to playlists and podcasts in clear room-filling stereo sound is so much more enjoyable.

### Technical Information

#### Bluetooth Re-Master

Bluetooth Re-Master compensates the signals that are lost due to data compression when streaming Bluetooth sounds. It gives you high-quality playback of sound sources from Bluetooth-compatible devices such as smartphones and tablets.

## Fresh Design, Flexible Placement

PM270's sleek design will complement any bookshelf or cabinet-top. The separate speakers can be positioned to suit your needs, and to help spread the stereo sound. All excess clutter's been removed to create a simple intuitive control surface.
