Dimensions

Depth	25 25/64"
Height	33 15/32"
Width	23 5/8"

Features & Benefits

Easy to use

A large see-through door provides light when loading. A stacking kit helps you put the dryer on top of the matching washer to save space in your laundry. Comes with a hose to drain water automatically.

Fabric care

Auto-sensing function cleverly senses the moisture level in the drum and stops the cycle automatically. This prevents your clothes from under or over drying and helps them last longer.

Healthier drying

Condensing technology removes water from the dryer into a tank or drain. This reduces moisture and allergens released into your laundry, compared with a front venting dryer. A healthier choice for allergy sufferers.

Anti vibration

Clever geometric designs on the side of your dryer and insulation inside the drum help to minimize the vibrations when in operation, keeping your dryer nice and quiet.

Drying rack

Some items are too precious to tumble dry so a drying rack is provided to offer a gentle drying option.

Gentle tumble

The stainless steel drum has been uniquely designed to gently tumble dry your clothing and help prevent lint from occurring.
