

STONEY ISLAND

LED light with dimmer

Sensor Technology

The pairing of glass and brilliant stainless steel, make it ideal for any kitchen with island blending perfectly with other appliances.

Perimeter Aspiration technology helps to achieve Top Performance by delivering more powerful and efficient fume extraction, plus it reduces noise. Available in 36" & 42" widths, Stoney island includes a powerful 600 CFM blower, LED lighting with dimmable feature and glass capacitive touch controls.

Like all of the hoods from Elica Techne Plus, Stoney island is also meant for anyone who loves high-technological solutions, where Elica hoods and cooktops automatically communicate with one another, recognizing quality and quantity of cooking vapors, thus accordingly adjusting performance levels.

FEATURES

| | |
|-------------------|--|
| Size (in) & Type | 36" or 42" wide Island Chimney |
| Finish | Stainless Steel + Black Glass |
| Controls | Touch Control 3S + Booster (Sensor) |
| Illumination | 4 Premium LED Dimmable Lights |
| Installation Type | Ducted |
| Blower Type | Speed 1, 180 CFMs Speed 2, 300 CFMs Speed 3, 470 CFMs Speed 4, 600 CFMs |
| Filter Type | Al. Mesh + Perimeter Aspiration |
| Noise (sones): | Min: 1.46, Max: 6 Sones |
| Duct Transition | Round 6"/150cms |
| Electrical | 120 Volts, 60 Hertz, 460 Watts, 3.7 Amps |

Line Drawing

| | Models | |
|------------|---|----------------|
| | ESI636SS | ESI642SS |
| A | 36" (91.4 cm) | 42" (106.7 cm) |
| B | 27 1/8" (69.6 cm) | |
| C* | Min: 32 1/8" (82.3 cm) Max: 52 1/8" (133.1 cm) | |
| D** | Min: 32 1/8" (82.3 cm) Max: 46 1/2" (118.1 cm) | |
| E | 6" (15.24 cm) | |
| F | 12 1/8" (30.8 cm) | |
| G | 13 1/8" (33.5 cm) | |

Accessories

Optional Recirculating Kit
CODE: KIT02721 / (36", 42")

Optional Long Chimney Extension
CODE: KIT02785 / (36", 42")

PLUS

TOP PERFORMANCE

Excellent performance for models equipped with this plus. High fume capturing capacity with an average aspiration range of 600 CFM's. With a noise level between 60-65 db(A) at maximum speed (reference point varies based on the hood category).

WIRELESS CONNECTIVITY

The wireless connection ensures constant communication between the induction cooktop and the cooker hood. Usage information of the cooktop (activated zones, cooking power and presence of pots) are transmitted in real time to the hood that processes them. The hood then selects automatically the optimum operating level to ensure a better quality of the air inside the kitchen. In this way it is possible to focus entirely on the food preparation. The hood turns off automatically when it is no longer necessary extracting cooking fumes, thus avoiding a waste of energy.

PERIMETER ASPIRATION

First developed by Elica, this technology literally turned the market 45 degrees and opened the door to hoods that could be mounted on the wall like picture frames. The technology draws air through a narrowed channel around a faceplate, which increases suction, without increasing blower speed or energy consumption.

AMBIENT LIGHT

Elica studies on hood lighting leaves no stone unturned. Here we have thought about products not only able to light the cooktop, but the entire kitchen space. And so the hood is transformed: from a kitchen appliance to a true lighting element. Considering the design of Elica hoods, it is not hard to imagine how this option is unique, and represents one extraordinary point of strength for us.

LED LIGHT

LED lighting is undoubtedly the smartest solution in terms of energy saving. Expected life time of over 20.000 hours, represents the most remarkable advantage of LED light bulbs.

DIM-LIGHT

The Dimmer allows you to adjust the brightness of the light as you wish. With Elica, lighting is customized in a discreet, personal and practical way, in order to contribute in creating the perfect kitchen atmosphere.

SENSOR TECHNOLOGY

Some Elica range hoods come equipped with a sensor that measures temperature and the amount of moisture, grease and vapors generated by the cooktop. The hood analyzes the readings and automatically adjusts the blower to achieve top ventilating performance and perfect air quality.

HUSH SYSTEM

An exclusive sound deadening technology that effectively reduces sound levels by over 35%, compared to typical range hoods.

CFM REDUCTION

CFM Reduction System (CRS), is an exclusive feature to Elica hoods, which enables the installer to reduce the maximum blower CFM, to meet local code requirements.
