

Getting started with your **top freezer refrigerator**

Before you start

Set up your refrigerator

Remove the tape and glue residue from surfaces before turning on the refrigerator. Choose a place near a grounded electrical outlet, allowing for clearances for ease of installation, proper circulation, and plumbing and electrical connections.

Before operating for the first time

After you remove all of the packaging materials, clean the inside of your refrigerator before using it. See the **CARE AND CLEANING** section in your Use & Care Manual.

You're in control

Your refrigerator controls

It's easy! When first turning your appliance on, adjust the controls to the factory set **Recommended**. After 24 hours, adjust the controls in small increments (if desired), allowing the temperatures to stabilize. The refrigerator control changes temperatures in both the refrigerator and the freezer. The freezer control moves the damper in the freezer. Adjust the freezer control toward **Cold** to open the damper, making the freezer temperature warmer. Adjust it toward **Coldest** to close the damper, making the freezer colder.

- Adjusting the refrigerator temperature control to **OFF** turns off the compressor and prevents the refrigerator from cooling, but does not disconnect the power to the light bulb and other electrical components. To turn off power to your refrigerator, you must unplug the power cord from the wall outlet.

- For warmer temperatures, adjust the temperature toward **Cold**.
- Both the refrigerator and freezer controls can be left at the factory preset (**Recommended**) or adjusted as desired.
- For colder temperatures, adjust the setting toward **Coldest**.

Remember

For the best circulation, do not block cold air vents with food.

Quick care

A little love goes a long way

Keeping your refrigerator clean maintains its appearance and freshness.

Be gentle

Clean with warm water and mild soap. For stainless steel models only, use **Frigidaire ReadyClean™ Stainless Steel Cleaner**.

5304508691

Accessorize it!

PureAir™ RAF-1 Air Filter ready

More powerful than baking soda, Frigidaire **PureAir RAF-1 Air Filter** absorbs undesirable smells keeping your fridge fresher for up to 6 months with carbon technology. Order your **PureAir RAF-1 Air Filter Ready Starter Kit** at Frigidaire.com or a Frigidaire authorized retailer.

BRPAULTRA2KIT

Ice Maker ready

Enjoy the largest ice bucket capacity available without sacrificing valuable freezer space thanks to our optional slim ice maker. **Note:** You can make more ice by setting the freezer to a colder setting. For information about **Ice Maker Kit 117000**, go to Frigidaire.com or any Frigidaire authorized retailer.

FAQs

Why does my refrigerator run most of the time? Is this normal?

Today's refrigerators are designed with a variable speed compressor to be more energy efficient than previous models. This means that they run longer cycles, or run continuously, to maintain an even temperature inside.

Please note: starting a unit takes about 10 times as much energy as it does to keep it running.

Is it normal for my refrigerator to make noises?

Your new high-efficiency refrigerator may make unfamiliar sounds due to the variable speed compressor. See the **NORMAL OPERATING SOUNDS** section of your Use & Care Manual.

Find more **TROUBLESHOOTING** tips in the back of your Use & Care Manual.

Let's make it official!

Take the first step to becoming a part of the Frigidaire family and discover more benefits by registering your top freezer refrigerator.

Look for the PhotoregisterSM icon on your registration card.
